Project Waterfall - customer interview - October 8th

Our group's questions:

- Should the efficiency of each employee be checked?
- After vacation process is sent, if it's later cancelled, should the request go through approval again?
  Answer: 2 days beforehand, the supervisor gets notified if an employee cancels their vacation.
- What if supervisor gets sick? Where should a supervisor log in his/hers sickness or vacation time?
- What happens if an employee works more than 10 hours a day? Do they get a warning notification? Does the supervisor get a notification?
  Answer: Employee can't work more than 10 hours a day. Otherwise, the supervisor (not the employee) will be notified about this. HR should not be warned.
- What features does the software have? What functions does the app have? Does the customer want to improve any particular feature?
- (About slide 10) What happens if the time account is out of range? Does the employee get a warning notification?
- Is the break time strictly fixed? What happens if an employee takes a longer break than they're supposed to? Is there a required break time?
  Answer:
  Work time < 6 hours $\rightarrow$ break is optional

Work time > 6 hours → 30-minute break
Work time > 9 hours → 1-hour break

- Is an employee's entry/exit time strictly fixed? Do they have to come and go at a specific time?
  Answer: The entry/exit time depends on the customer with whom the employee is working, so the timing is flexible. The employee obviously needs to have some time to himself between working days.

Other groups' questions and answers:

- (Slide 9) An admin should exist
- 7 days of vacation time is possible. If the 7 days vacation time is not used in a year, the employee is informed (via a notification) that they can use these remaining vacation time in the first 3 months of the next year. The notification says, "Please take them now or they'll be erased".
- Working hours limit per day notification?
  Answer: Employee can't work more than 10 hours a day. Otherwise, the supervisor (not the employee) will be notified about this. HR should not be warned.
- Authentication methods: should it be a passkey, an employee card, etc.? Answer: The way of authentication isn't important to the customer.
- Who creates a new project? How should projects be named?

Answer: Project names have to be unique. Any Employee can create a new project.

- If the employee works more than 10 hours a day, does the supervisor get notified?
  Answer: yes, preferably via a dashboard and an email, although the customer doesn't want to pay for a dashboard.
- Flex time balance: Does it update automatically?
  Answer: Supervisor should approve it first and *then* it gets updated.
- How long is a break?
  Answer:
  Work time < 6 hours → break is optional
  Work time > 6 hours → 30-minute break
  Work time > 9 hours → 1-hour break
- How should the user access the software (mobile app, desktop, web)?
  Answer: "From everywhere." (Online, laptop, ...)
- Location limit to access the data on the software?
  Answer:
  HR has access to the data *only* from the company grounds.
  Employee has access to the data from everywhere.
  Supervisor has access to the data from everywhere.
- When does the supervisor have access to the employees' data?
  Answer: Once a month.

- Can an employee add vacation time directly into the software (without having to send a request to HR)?
  Answer: no.
- No approval is needed for sick days. The supervisor takes action when sick days take too long.
- HR are also employees.
- Planned vacation: how long before a planned vacation should the employee inform the company?
  Answer: “one day.”
- If an employee cancels their vacation, should they send a request for a vacation again?
  Answer: 2 days beforehand, the supervisor gets notified if an employee cancels their vacation.

The type of cloud storage isn’t clarified by the customer (it could be Google or something else. The option is left to the developers).
